

# DUPR Information Session

# What is DUPR?

## *Dynamic Universal Pickleball Rating*

All players, regardless of their age, gender, location, and skill, are rated on the same scale based on their match results.

# Why DUPR at Pickleball Moncton?

- Self-Rating is often not accurate
- DUPR is based on players' match results – no testing needed
- It is now integrated with Pickleball Brackets for tournaments
- Makes it easier to group players by similar skill levels
- Easier to determining sessions needed to match skill levels of members

# Who Can Have a DUPR Rating?

- DUPR is free, and anyone can get a rating.
- All new players start as NR (Not Rated) and progress through a scale ranging from 2.000 to 8.000.
- Every match counts toward your rating, even if you are playing against someone who is unrated or new to DUPR.
- Your DUPR automatically updates every time a match result is submitted.
- Players can have both a singles and doubles rating.

# DUPR RATING SCALE

# How is DUPR Rating Calculated?

DUPR uses a player's last rating to update their new rating. The algorithm considers the following factors:

## 1 – Match Results

- If you win, your rating will go up and if you lose, your rating will go down.
- Winning by a large margin increases your rating more than a narrow victory.
- Winning against players rated at or above your level increases your rating more than winning against players rated below you.

## 2 - Match and Player Characteristics

- Players with more matches will see less fluctuation in their ratings compared to those with fewer matches.
- Recent matches impact your rating more than older ones.
- Ratings are affected differently depending on whether the match was a self-posted recreational game, a club match, or a DUPR entered tournament/league result.

# DUPR Reliability Score

- Player profiles shows two key numbers:
  - your **DUPR Rating** (2.000–8.000)
  - your **Reliability Score** (1–100%)
- Reliability Score shows how accurate your rating is. A low reliability means your data is outdated or insufficient.
- To keep your rating accurate, play consistently and often.
- A passing Reliability Score is 60%, but achieving this score is just the beginning. Aim for a fully reliable rating, which is 100%.

# DUPR Implementation Process

## DUPR Rating Sessions

*(Starting February 1st, 2025)*

- **DUPR Rating Sessions will be added to schedule – to build your DUPR Rating**
  - Register for sessions on **Playtime Scheduler**
  - Score sheets will be available on all courts and collected by a session coordinator
  - Scores will be submitted to DUPR by Club administrators
- **How groups will be divided** (based on actual DUPR rating)?
  - NR (Not Rated) and under 3.00
  - 3.00 to 3.49 DUPR rated regardless reliability
  - 3.5 to 3.374 DUPR rated regardless reliability and includes NR from Advance group
  - 3.75 and above DUPR rated regardless reliability
  - *This could be modified depending on the demand*

# DUPR Implementation Process

## Updates to Sessions (bubbles)

*(Starting in March 2025)*

- **Sessions will be by DUPR Skill Levels (instead of self-rating)**
  - Players must be over the minimum session skill level with a 60% Reliability Score
  - Register to play on **Playtime Scheduler**
  - Scores will not be submitted to DUPR

# Tips for Successful DUPR Implementation

- Ensure you don't have duplicate DUPR accounts (check different spellings of your name).
- Participate in DUPR Rating Sessions (or tournaments) to keep your Reliability Score at 60% minimum.
- Once you have a reliable DUPR Rating (min of 60%), update your self-rating in Playtime Scheduler (under Account). Choose the closest minimum rating. (i.e., If you have a 3.60 DUPR Rating, choose 3.5)
- Members to provide feedback to the Club.

*The Club will review feedback from members, monitor attendance to ensure the maximum number of members can participate, and adjust as needed.*
